DETAILED ACTION

Applicants' arguments, filed April 26, 2005, have been fully considered and they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-3 remain rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Please see the previous office action for this rejection.

The applicant has amended claim 1 to include step (f) which recites, "determining a base sequence of nucleic acid by connecting sequence analyzed portions." Although the applicant has amended the claims to include an active step of determining nucleic acid sequences, the instant claims are still directed to non-statutory subject matter without requiring performance of a result outside of a computer. (Please see "Computer-Related Inventions" section of the MPEP at section 2106, Part IV, subpart B) For example, as the instant claims are written, the claimed method may occur entirely within the processor of a computer without any indication to a practitioner that the computer is performing the method. Thus the manipulation of data or conversion of

Art Unit: 1631

data, in this case detected data of electrophoresis of a fragment sample of nucleic acid, is the claimed subject matter without any physical transformation outside the computer. For example, the MPEP section also clarifies that claiming such non-statutory subject matter on a computer medium or in software does not prevent this rejection.

This rejection is maintained from the previous office action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
